Tele-abortion

Instead of attending a Marie Stopes Australia clinic in person, your patient will have her medical abortion consultation at home. She will connect via a Skype videocall to a Marie Stopes Australia doctor in another location who will conduct the consultation in accordance with the law in your patient's state. She will have access to free decision-based counselling beforehand if needed. After the consultation, Marie Stopes Australia will send the medications via registered courier. Your patient will take the medications at home with a support person and as directed by the doctor. She will have access to our free 24-hour telephone nurse aftercare number. We will conduct a follow-up assessment and may engage your support if and when necessary.

Patient meets the tele-abortion eligibility criteria

- Lives in VIC, NSW, NT, QLD, TAS or WA
- Has access to 24-hour emergency medical care within one hour of her home
- Is less than 8 weeks' gestation (to ensure she is < 63 days at time of treatment) at the time of her appointment
- Is at least 16 years old
- Has a Medicare card
- Speaks and understands English and can follow complex instructions
- Has access to the Internet, telephone and a computer, laptop or tablet
- Has ultrasound and bHCG evidence of pregnancy, in addition to a documented Rhesus blood group

Certain medical conditions are contraindicated in the use of MS-2 Step. Please visit the MS Health website for the full product information sheet for medical professionals at mshealth.com.au.

Patient has had an ultrasound to assess pregnancy

- Yes, the pregnancy has been confirmed through ultrasound → **Please fax ultrasound report to 03 9658 7440**
- No, the ultrasound is booked
